Advancing Wood Architecture: A Computational Approach

Advancing Wood Architecture: A Computational Approach

Advancing Wood Architecture: A Computational Approach

In light of environmental challenges architecture is facing, wood is no longer regarded as outmoded, nostalgic, and rooted in the past, but increasingly recognized as one of the most promising building materials for the future. Recent years have seen unprecedented innovation of new technologies for advancing wood architecture.

Advancing Wood Architecture offers a comprehensive overview of the new architectural possibilities that are enabled by cutting-edge computational technologies in wood construction. It provides both an overarching architectural understanding and in-depth technological information through built projects and the works of four leading design research groups in Europe. The projects presented include large scale, permanent buildings such as the ETH Arch-Tec Lab Building in Zurich, the Landesgartenschau Exhibition Hall near Stuttgart and the Boiler House in Hooke Park, UK, as well as, built research prototypes investigating additive robotic fabrication, folded plate structures and meteorosensitive building skins.

Illustrated in full colour, the book showcases the latest technological developments in design computation, simulation and digital fabrication together with an architectural, engineering and manufacturing perspective, offering an outlook towards novel spatial and constructional opportunities of a material with unrivalled ecological virtues.

From reader reviews:

Pamela Steele:

Inside other case, little people like to read book Advancing Wood Architecture: A Computational Approach. You can choose the best book if you'd prefer reading a book. Provided that we know about how is important any book Advancing Wood Architecture: A Computational Approach. You can add expertise and of course you can around the world by the book. Absolutely right, due to the fact from book you can learn everything! From your country until eventually foreign or abroad you can be known. About simple thing until wonderful thing you can know that. In this era, we could open a book or perhaps searching by internet unit. It is called e-book. You can utilize it when you feel bored to go to the library. Let's learn.

Micah Best:

Playing with family in the park, coming to see the sea world or hanging out with friends is thing that usually you have done when you have spare time, after that why you don't try thing that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Advancing Wood Architecture: A Computational Approach, it is possible to enjoy both. It is good combination right, you still wish to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't understand it, oh come on its known as reading friends.

Darrin Russell:

This Advancing Wood Architecture: A Computational Approach is great reserve for you because the content that is certainly full of information for you who have always deal with world and get to make decision every minute. That book reveal it details accurately using great organize word or we can say no rambling sentences in it. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but tricky core information with beautiful delivering sentences. Having Advancing Wood Architecture: A Computational Approach in your hand like keeping the world in your arm, data in it is not ridiculous one. We can say that no publication that offer you world throughout ten or fifteen tiny right but this book already do that. So , this is good reading book. Hey there Mr. and Mrs. stressful do you still doubt this?

Ian Hall:

As a student exactly feel bored for you to reading. If their teacher requested them to go to the library or to make summary for some guide, they are complained. Just minor students that has reading's heart and soul or real their pastime. They just do what the professor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that looking at is not important, boring along with can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Advancing Wood Architecture: A Computational Approach can make you really feel

more interested to read.
