Ear Biometrics in 2D and 3D: Localization and Recognition (Augmented Vision and Reality) Surya Prakash, Phalguni Gupta

This book presents the state-of-the-art techniques and recent research progress on Ear Biometrics. Among the various physiological traits, the reasons for the ear to gain much attention in recent years are many folds. It has been found to be a reliable biometrics for human verification and identification. Ears are remarkably consistent and unlike face, it does not change shape with different expressions or age, and remain fixed in the middle of the side of the head against a predictable background. The book contains figures, tables and plots to illustrate the techniques in an easy and lucid manner. The book also provides an extensive literature on the subject, where readers have the benefit of receiving all the relevant material at one place in a very comprehensive manner. This book caters students, academics, researchers, practitioners who are interested in the field of Ear Biometrics and its applications in face recognition and security.

From reader reviews:

Holly Silva:

Nowadays reading books are more than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge even the information inside the book in which improve your knowledge and information. The info you get based on what kind of reserve you read, if you want drive more knowledge just go with knowledge books but if you want really feel happy read one using theme for entertaining for example comic or novel. Typically the Ear Biometrics in 2D and 3D: Localization and Recognition (Augmented Vision and Reality) is kind of reserve which is giving the reader unstable experience.

Brandy Hagaman:

Reading a guide tends to be new life style within this era globalization. With reading through you can get a lot of information that will give you benefit in your life. With book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or perhaps their experience. Not only the storyplot that share in the guides. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on this planet always try to improve their ability in writing, they also doing some research before they write for their book. One of them is this Ear Biometrics in 2D and 3D: Localization and Recognition (Augmented Vision and Reality).

Cheryl Thornton:

On this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become considered one of it? It is just simple way to have that. What you must do is just spending your time little but quite enough to possess a look at some books. Among the books in the top list in your reading list is Ear Biometrics in 2D and 3D: Localization and Recognition (Augmented Vision and Reality). This book and that is qualified as The Hungry Hillside can get you closer in turning into precious person. By looking right up and review this reserve you can get many advantages.

Melissa Becker:

As a college student exactly feel bored in order to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this Ear Biometrics in 2D and 3D: Localization and Recognition (Augmented Vision and Reality) can make you truly feel more interested to read.
