Law and Objectivity Kent Greenawalt

In modern times the idea of the objectivity of law has been undermined by skepticism about legal institutions, disbelief in ideals of unbiased evaluation, and a conviction that language is indeterminate. Greenawalt here considers the validity of such skepticism, examining such questions as: whether the law as it exists provides determinate answers to legal problems; whether the law should treat people in an "objective way," according to abstract rules, general categories, and external consequences; and how far the law is anchored in something external to itself, such as social morality, political justice, or economic efficiency. In the process he illuminates the development of jurisprudence in the English-speaking world over the last fifty years, assessing the contributions of many important movements.
