Learning about the Water Cycle with Graphic Organizers (Graphic Organizers in Social Studies and Science) Isaac Nadeau

Give students a head start in both science and organization. This unique and innovative new series pairs practical Information with useful learning tools in the form of graphic organizers. Each book features a subject pulled directly from the K-4 Earth science curriculum plus nine graphic organizers that highlight facts about each chapter topic. Venn diagrams, charts, concept webs, maps, timelines, and more are used to present facts and to show students how these tools can be used for learning. Color photographs are included to support chapter text and illustrate the topics students are reading about. Students will realize that even the hardest concepts can be broken down into pieces of Information that are easy to learn and remember. Kids will lie fascinated to learn that Earth has had the same amount of water for billions of years. The amount of water never changes as water moves through streams, oceans, plants, people, animals, the ground, the air, and more. Evaporation, condensation, and precipitation are all included in this easy-to-follow journey through the water cycle. Pie charts, a sequence chart, and a Venn diagram are some of the many graphic organizers that display facts about water and its importance to life on Earth.
