Advanced Internet Technology and E-commerce is a thorough and practical guide for developing Internet applications and e-commerce solutions. The handbook provides the required knowledge and skills in advanced Internet technologies particularly related to server-side Internet programming and business-to-business systems. While learning various state-ofthe- art web technologies, readers will also learn how to construct distributed Internet applications. The audience can be divided into two segments. The first segment is the undergraduate and postgraduate students of IT programs. This book is based upon the undergraduate and postgraduate syllabus of various Indian and International Universities. The second is for the computer professionals who may be interested in knowing advanced Internet technology concepts and related programming and scripting languages. Contents: Introduction to Advanced Internet Programming and Protocols Server Side Scripting Through JavaScript Server Side Scripting through VBScript Advanced Web Technologies Java Beans, JDBC, CORBA, RMI Server-side Scripting through ASP.NET Server-side Scripting through CGI Server-side Scripting through PHP and XML Server-side Scripting through ADO.Net Server-side Scripting through VB.Net Ecommerce and Internet Security
