This is a study of the novel "El obsceno pajarito de la noche" from the perspective of Jung's analytical psychology. The author explores how Jose Donoso utilized Jung's material to create his own literary version of that psychology. The novel is a structure of carefully connected multi-level images which originate in the disturbed psyche of the protagonist and are shown to depict the Jungian concept of individuation. The author demonstrates that the imagery derives from alchemy's prima materia, Mercurius, soluto. Sulphur/quicksilver, retort, sol/luna, together with alchemical references to mythology - all is criticism on the novel. The documentation also includes substantive material from the Hebrew Cabala and the Hindu Upanishads, parallel fields referred to by Jung and incorporated by Donoso.
