Statistical Literacy for Clinical Practitioners

William H. Holmes, William C. Rinaman

Statistical Literacy for Clinical Practitioners William H. Holmes, William C. Rinaman

This textbook on statistics is written for students in medicine, epidemiology, and public health. It builds on the important role evidence-based medicine now plays in the clinical practice of physicians, physician assistants and allied health practitioners. By bringing research design and statistics to the fore, this book can integrate these skills into the curricula of professional programs. Students, particularly practitioners-in-training, will learn statistical skills that are required of today's clinicians. Practice problems at the end of each chapter and downloadable data sets provided by the authors ensure readers get practical experience that they can then apply to their own work.

From reader reviews:

Shawna Vaughn:

Nowadays reading books become more than want or need but also work as a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The data you get based on what kind of e-book you read, if you want get more knowledge just go with schooling books but if you want experience happy read one with theme for entertaining including comic or novel. The particular Statistical Literacy for Clinical Practitioners is kind of book which is giving the reader unstable experience.

Eldon Hall:

A lot of people always spent their own free time to vacation or go to the outside with them family or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you would like try to find a new activity honestly, that is look different you can read a new book. It is really fun for you personally. If you enjoy the book that you simply read you can spent 24 hours a day to reading a book. The book Statistical Literacy for Clinical Practitioners it doesn't matter what good to read. There are a lot of those who recommended this book. They were enjoying reading this book. If you did not have enough space to create this book you can buy often the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not too expensive but this book provides high quality.

Deborah Rost:

This Statistical Literacy for Clinical Practitioners is great publication for you because the content which is full of information for you who all always deal with world and possess to make decision every minute. This book reveal it information accurately using great organize word or we can point out no rambling sentences within it. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but hard core information with wonderful delivering sentences. Having Statistical Literacy for Clinical Practitioners in your hand like keeping the world in your arm, facts in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen second right but this publication already do that. So , it is good reading book. Hey there Mr. and Mrs. occupied do you still doubt in which?

Doris Avey:

Is it a person who having spare time subsequently spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Statistical Literacy for Clinical Practitioners can be the reply, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these publications have than the others?
