3D Biometrics: Systems and Applications

David Zhang, Guangming Lu

3D Biometrics: Systems and Applications

David Zhang, Guangming Lu

3D Biometrics: Systems and Applications David Zhang, Guangming Lu
Automatic personal authentication using biometric information is becoming more essential in applications of public security, access control, forensics, banking, etc. Many kinds of biometric authentication techniques have been developed based on different biometric characteristics. However, most of the physical biometric recognition techniques are based on two dimensional (2D) images, despite the fact that human characteristics are three dimensional (3D) surfaces. Recently, 3D techniques have been applied to biometric applications such as 3D face, 3D palmprint, 3D fingerprint, and 3D ear recognition. This book introduces four typical 3D imaging methods, and presents some case studies in the field of 3D biometrics. This book also includes many efficient 3D feature extraction, matching, and fusion algorithms. These 3D imaging methods and their applications are given as follows: - Single view imaging with line structured-light: 3D ear identification - Single view imaging with multi-line structured-light: 3D palmprint authentication - Single view imaging using only 3D camera: 3D hand verification - Multi-view imaging: 3D fingerprint recognition *3D Biometrics: Systems and Applications* is a comprehensive introduction to both theoretical issues and practical implementation in 3D biometric authentication. It will serve as a textbook or as a useful reference for graduate students and researchers in the fields of computer science, electrical engineering, systems science, and information technology. Researchers and practitioners in industry and R&D laboratories working on security system design, biometrics, immigration, law enforcement, control, and pattern recognition will also find much of interest in this book.

From reader reviews:

Orlando Bush:

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a move, shopping, or went to the particular Mall. How about open or even read a book entitled 3D Biometrics: Systems and Applications? Maybe it is for being best activity for you. You realize beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with the opinion or you have some other opinion?

Andrew Martin:

Nowadays reading books are more than want or need but also get a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The data you get based on what kind of book you read, if you want send more knowledge just go with training books but if you want really feel happy read one along with theme for entertaining for example comic or novel. The actual 3D Biometrics: Systems and Applications is kind of e-book which is giving the reader unstable experience.

Scott Manuel:

Playing with family in a very park, coming to see the water world or hanging out with friends is thing that usually you could have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love 3D Biometrics: Systems and Applications, you may enjoy both. It is great combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout guys. What? Still don't get it, oh come on its named reading friends.

Sophie Clark:

Do you have something that you want such as book? The book lovers usually prefer to choose book like comic, limited story and the biggest you are novel. Now, why not trying 3D Biometrics: Systems and Applications that give your fun preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the way for people to know world much better then how they react when it comes to the world. It can't be claimed constantly that reading habit only for the geeky individual but for all of you who wants to be success person. So , for every you who want to start studying as your good habit, you are able to pick 3D Biometrics: Systems and Applications become your own personal starter.
