Fluid Dynamics, Volume 18A (Methods in Experimental Physics)

"We know of no one more qualified than Professor Raymond Emrich to have edited this volume of 'Methods of Experimental Physics; - 'Fluid Dynamics.' Together with a number of outstanding and eminent contributors Professor Emrich has produced a volume that we believe will be of unusual value to the physics community. Because of the central role of fluid phenomena in so many of the subdisciplines of physics as well as in engineering and the life sciences, the usefulness of this volume may be extraordinarily broad. Our gratitude goes to all involved." L. Marton and C. Marton
