Heat Pump Planning Handbook

Jürgen Bonin

Heat Pump Planning Handbook Jürgen Bonin

The Heat Pump Planning Handbook contains practical information and guidance on the design, planning and selection of heat pump systems, allowing engineers, designers, architects and construction specialists to compare a number of different systems and options. Including detailed descriptions of components and their functions and reflecting the current state of technology this guide contains sample tasks and solutions as well as new model calculations and planning evaluations. Also economic factors and alternative energy sources are covered, which are essential at a time of rising heat costs.

Topics included:

Ecological and economic aspects

Introduction to Refrigeration

Water heat pump systems

Configuration of all necessary components

Planning Examples (Problems and Solutions)
