Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) Claude Mitschi, David Sauzin

Providing an elementary introduction to analytic continuation and monodromy, the first part of this volume applies these notions to the local and global study of complex linear differential equations, their formal solutions at singular points, their monodromy and their differential Galois groups. The Riemann-Hilbert problem is discussed from Bolibrukh's point of view.

The second part expounds 1-summability and Ecalle's theory of resurgence under fairly general conditions. It contains numerous examples and presents an analysis of the singularities in the Borel plane via "alien calculus", which provides a full description of the Stokes phenomenon for linear or non-linear differential or difference equations.

The first of a series of three, entitled *Divergent Series, Summability and Resurgence*, this volume is aimed at graduate students, mathematicians and theoretical physicists interested in geometric, algebraic or local analytic properties of dynamical systems. It includes useful exercises with solutions. The prerequisites are a working knowledge of elementary complex analysis and differential algebra.

From reader reviews:

Jaclyn Davis:

This Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) are generally reliable for you who want to be considered a successful person, why. The main reason of this Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) can be one of the great books you must have will be giving you more than just simple looking at food but feed an individual with information that possibly will shock your preceding knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions in the e-book and printed ones. Beside that this Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) forcing you to have an enormous of experience such as rich vocabulary, giving you test of critical thinking that we know it useful in your day pastime. So , let's have it and revel in reading.

Sharon Garcia:

As we know that book is essential thing to add our knowledge for everything. By a guide we can know everything you want. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) was filled concerning science. Spend your spare time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading some sort of book. If you know how big selling point of a book, you can feel enjoy to read a e-book. In the modern era like currently, many ways to get book which you wanted.

Adriana Cornell:

That guide can make you to feel relax. This particular book Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) was colourful and of course has pictures on there. As we know that book Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics) has many kinds or variety. Start from kids until young adults. For example Naruto or Private eye Conan you can read and believe that you are the character on there. So , not at all of book are make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading which.

Francis Lopez:

What is your hobby? Have you heard that will question when you got pupils? We believe that that issue was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you also know that little person like reading or as examining become their hobby. You need to understand that reading is very important and also book as to be the issue. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You find good news or update in relation to something by book. A

substantial number of sorts of books that can you decide to try be your object. One of them is actually Divergent Series, Summability and Resurgence I: Monodromy and Resurgence (Lecture Notes in Mathematics).
