A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering

Dr. Thomas G. Lang

A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering Dr. Thomas G. Lang
A basic engineering design theory is created that includes the development of a generalized engineering design procedure. A specific objective is to find the best design that satisfies a given design goal. A more general and powerful objective is to find all of the best designs, and the families of designs, that satisfy an entire field of design problems. A non-dimensional approach is typically used to simplify the procedure and find fundamental design forms. Many examples of the design procedure are provided, often leading to surprising new design results. Emphasis is placed on the understanding and use of this new theory and the resulting generalized design procedure. Together, the design theory and the procedure provide a better understanding of the design process, design goals, design variables, design forms, optimum designs, optimization criteria, direct relationships between design problems and their solutions, design fields and families, scaling laws, optimized scaling and the best ways to graph design results. Examples of the design procedure range from simple to complex; and cover hydrodynamic, aeronautical and mechanical design fields. The many examples include hydrofoils, aircraft wings, and underwater vehicles. Most of these examples are basic and broad enough to be considered classic. Additionally, the theory and procedure can be used in disciplines other than engineering. Furthermore, aspects of the theory and procedure are helpful in research and invention.

From reader reviews:

Henry Barba:

Now a day those who Living in the era just where everything reachable by connect with the internet and the resources in it can be true or not require people to be aware of each facts they get. How people have to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Looking at a book can help folks out of this uncertainty Information especially this A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering book since this book offers you rich data and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you know.

Kim Bogdan:

The knowledge that you get from A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering will be the more deep you digging the information that hide into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering giving you joy feeling of reading. The article writer conveys their point in specific way that can be understood by means of anyone who read it because the author of this publication is well-known enough. This particular book also makes your own vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this particular A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering instantly.

Joanne Hall:

Hey guys, do you really wants to finds a new book to see? May be the book with the headline A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering suitable to you? Often the book was written by popular writer in this era. Often the book untitled A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering is the main of several books that will everyone read now. This kind of book was inspired a lot of people in the world. When you read this guide you will enter the new age that you ever know ahead of. The author explained their thought in the simple way, consequently all of people can easily to understand the core of this publication. This book will give you a lot of information about this world now. So you can see the represented of the world on this book.

Paul Lopez:

On this era which is the greater person or who has ability to do something more are more precious than other. Do you want to become one among it? It is just simple way to have that. What you must do is just spending your time not very much but quite enough to possess a look at some books. On the list of books in the top list in your reading list is A Generalized Engineering Design Procedure: A thesis in Aerospace Engineering. This book which can be qualified as The Hungry Hillside can get you closer in becoming precious person. By looking up and review this book you can get many advantages.
