Book Description

This book of projects highlights how TensorFlow can be used in different scenarios - this includes projects for training models, machine learning, deep learning, and working with various neural networks. Each project provides exciting and insightful exercises that will teach you how to use TensorFlow and show you how layers of data can be explored by working with Tensors. Simply pick a project that is in line with your environment and get stacks of information on how to implement TensorFlow in production.

What you will learn

- Load, interact, dissect, process, and save complex datasets
- Solve classification and regression problems using state of the art techniques
- Predict the outcome of a simple time series using Linear Regression modeling
- Use a Logistic Regression scheme to predict the future result of a time series
- Classify images using deep neural network schemes
- Tag a set of images and detect features using a deep neural network, including a Convolutional Neural Network (CNN) layer
- Resolve character recognition problems using the Recurrent Neural Network (RNN) model

About the Author

Rodolfo Bonnin is a systems engineer and PhD student at Universidad Tecnologica Nacional, Argentina. He also pursued parallel programming and image understanding postgraduate courses at Uni Stuttgart, Germany.

He has done research on high performance computing since 2005 and began studying and implementing convolutional neural networks in 2008, writing a CPU and GPU - supporting neural network feed forward stage. More recently he's been working in the field of fraud pattern detection with Neural Networks, and is currently working on signal classification using ML techniques.

Table of Contents

1. Exploring and Transforming Data
2. Clustering
3. Linear Regression
4. Logistic Regression
5. Simple FeedForward Neural Networks

6. Convolutional Neural Networks
7. Recurrent Neural Networks and LSTM
8. Deep Neural Networks
9. Running Models at Scale – GPU and Serving
10. Library Installation and Additional Tips

From reader reviews:

Todd Jacob:

Book is written, printed, or illustrated for everything. You can know everything you want by a publication. Book has a different type. As you may know that book is important factor to bring us around the world. Adjacent to that you can your reading ability was fluently. A publication Building Machine Learning Projects with TensorFlow will make you to possibly be smarter. You can feel much more confidence if you can know about everything. But some of you think that will open or reading a new book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you seeking best book or acceptable book with you?

Leigh Brown:

This Building Machine Learning Projects with TensorFlow usually are reliable for you who want to be a successful person, why. The key reason why of this Building Machine Learning Projects with TensorFlow can be one of many great books you must have is giving you more than just simple reading food but feed a person with information that maybe will shock your previous knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed people. Beside that this Building Machine Learning Projects with TensorFlow forcing you to have an enormous of experience including rich vocabulary, giving you test of critical thinking that we all know it useful in your day pastime. So , let's have it and revel in reading.

Kayla Wilson:

Playing with family inside a park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Building Machine Learning Projects with TensorFlow, you could enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh can happen its mind hangout guys. What? Still don't have it, oh come on its known as reading friends.

Kenneth Hoy:

With this era which is the greater man or who has ability in doing something more are more important than other. Do you want to become among it? It is just simple method to have that. What you need to do is just spending your time little but quite enough to have a look at some books. On the list of books in the top collection in your reading list is actually Building Machine Learning Projects with TensorFlow. This book that is qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking upward and review this book you can get many advantages.
