“Although, your health condition may impact your everyday life, do not let it define who you are.”

STELARA® (ustekinumab) injection is used to treat moderate-to-severe plaque psoriasis in patients who may benefit from receiving phototherapy (ultraviolet light treatment) or other treatments. This medicine may be used alone or in combination with methotrexate to treat active psoriatic arthritis. Ustekinumab injection is in a class of medications called monoclonal antibodies. It works by stopping the action of certain cells in the body that cause the symptoms of psoriasis. This medicine is available only with your doctor's prescription. Thanks and may you have a good understanding about this drug—STELARA® (ustekinumab). You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
