The Statistical Analysis of Interval-censored Failure Time Data (Statistics for Biology and Health)

Jianguo Sun

This book collects and unifies statistical models and methods that have been proposed for analyzing interval-censored failure time data. It provides the first comprehensive coverage of the topic of interval-censored data and complements the books on right-censored data. The focus of the book is on nonparametric and semiparametric inferences, but it also describes parametric and imputation approaches. This book provides an up-to-date reference for people who are conducting research on the analysis of interval-censored failure time data as well as for those who need to analyze interval-censored data to answer substantive questions.

From reader reviews:

Robert Irizarry:

Now a day people that Living in the era exactly where everything reachable by connect with the internet and the resources within it can be true or not demand people to be aware of each information they get. How a lot more to be smart in having any information nowadays? Of course the answer is reading a book. Studying a book can help individuals out of this uncertainty Information particularly this The Statistical Analysis of Interval-censored Failure Time Data (Statistics for Biology and Health) book as this book offers you rich facts and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it everbody knows.

Joseph Cosgrove:

Nowadays reading books become more and more than want or need but also work as a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge your information inside the book which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want attract knowledge just go with education and learning books but if you want feel happy read one having theme for entertaining including comic or novel. Often the The Statistical Analysis of Interval-censored Failure Time Data (Statistics for Biology and Health) is kind of reserve which is giving the reader unpredictable experience.

Stacie Logan:

Information is provisions for individuals to get better life, information currently can get by anyone from everywhere. The information can be a information or any news even a huge concern. What people must be consider if those information which is within the former life are difficult to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you receive the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen throughout you if you take The Statistical Analysis of Interval-censored Failure Time Data (Statistics for Biology and Health) as the daily resource information.

Jack Bemis:

A lot of book has printed but it differs from the others. You can get it by net on social media. You can choose the most effective book for you, science, comedy, novel, or whatever through searching from it. It is named of book The Statistical Analysis of Interval-censored Failure Time Data (Statistics for Biology and Health). You can include your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make anyone happier to read. It is most crucial that, you must aware about reserve. It can bring you from one location to other place.
