The Moonflower H. Peter Loewer

A lyrical account of nature after dark - perfect for children who want to know what goes on while they're asleep!

After children have been tucked into their beds on a warm summer evening, nighttime springs to life. With language that weaves its tale like the moonflower vine winding its way upward toward the sky, **THE MOONFLOWER** brings an often unseen world to light for the budding young naturalist. Sidebars containing interesting facts about these nocturnal creatures' habits complement the story of a mysterious, moonflower-inspired evening. Jean Loewer's soft illustrations and careful attention to detail bring an authenticity to moonflowers, hawkmoths, and owls that can barely be contained on the page. In addition, a glossary and instruction on how to grow your own moonflower vine make this an excellent reference tool for children interested in what goes on after dark.
