Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes)

Ten years ago, on December 26, 2004, one of the world's most destructive natural disasters occurred. A magnitude Mw 9.1 earthquake (third strongest ever instrumentally recorded) generated a global tsunami that killed about 230,000 people along the coasts of 14 countries in the Indian Ocean and propagated as far as the North Pacific and North Atlantic Oceans. Since then, various countries from around the globe contributed major funding to tsunami research and mitigation, enabling the installation of hundreds of new high-precision instruments, the development of new technology and the establishment of more modern communication systems. As a result, incredible progress has been achieved in tsunami research and operation during the ten years after the 2004 Indian Ocean tsunami.

The papers presented in this second of two special volumes of Pure and Applied Geophysics reflect the state of tsunami science during this time, including two papers devoted to global observations. Five papers provide new findings specifically in the Indian Ocean. Eight papers cover Pacific Ocean studies, focusing mainly on the 2011 Tohoku earthquake and tsunami. Remaining papers in the volume describe studies in the Atlantic and Mediterranean and general tsunami source studies.

The volume is of interest to scientists and practitioners involved in all aspects of tsunamis from earthquake source processes to transoceanic wave propagation and coastal impacts. Postgraduate students in geophysics, oceanography and coastal engineering – as well as students in the broader geosciences, civil and environmental engineering – will also find the book to be a valuable resource, as it combines recent case studies with advances in tsunami science and natural hazards mitigation.

From reader reviews:

Sandra Murray:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book that improve your knowledge and information. The details you get based on what kind of guide you read, if you want attract knowledge just go with knowledge books but if you want truly feel happy read one using theme for entertaining for instance comic or novel. Typically the Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes) is kind of reserve which is giving the reader unpredictable experience.

Joseph Cobble:

This Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes) are usually reliable for you who want to certainly be a successful person, why. The reason why of this Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes) can be on the list of great books you must have is giving you more than just simple reading food but feed a person with information that maybe will shock your prior knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in the e-book and printed types. Beside that this Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes) giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day exercise. So , let's have it and luxuriate in reading.

Rosa Reid:

Don't be worry when you are afraid that this book may filled the space in your house, you will get it in e-book method, more simple and reachable. This kind of Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes) can give you a lot of close friends because by you taking a look at this one book you have issue that they don't and make a person more like an interesting person. This kind of book can be one of a step for you to get success. This book offer you information that probably your friend doesn't understand, by knowing more than some other make you to be great men and women. So , why hesitate? Let's have Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes).

Jane Rippeon:

What is your hobby? Have you heard that will question when you got pupils? We believe that that query was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person just like reading or as reading become their hobby. You need to understand that reading is very important as well as book as to be the factor. Book is important thing to increase you knowledge, except your current teacher or lecturer. You discover good news or update in relation to

something by book. Many kinds of books that can you take to be your object. One of them is Tsunami Science: Ten years after the 2004 Indian Ocean Tsunami: Volume II (Pageoph Topical Volumes).
